G TECTS Office 2 is the second location of our offices located on Broadway in the Tribeca District of Manhattan. The 90 foot long by 10 foot wide space was left in its raw state, reminiscent of its warehouse beginnings. Parallel fluorescent lighting add a graphic element further emphasising the proportions of the space and set up the rhythm for the program areas. The space features eight custom designed work tables arranged perpendicularly to the length of the space leaving circulation open along one side. Bracketing the work space, the open kitchen and library shelving follow it while the printing and model storage areas precede it. The conference area sits at the end of this procession. An interior brick wall is left unpainted in contrast to the otherwise white interior, marked by the precise repetition of the lighting and the work tables.
